

TERRA / PRESS & MEDIA · EDITORIAL REVIEW COPY

A focused Thailand team spanning operations, design, communications and web

25 October 2026 | People & careers | Status: EDITORIAL DRAFT — NOT A PUBLISHED PRESS RELEASE

Terra's initial Thailand staffing mandate describes four operational capabilities: Front Desk & Executive Administration Coordination, UI/UX & Figma Product Design, Social Media, PR & Communications, and Web Implementation & Digital Platforms.

The workforce model places direct employment, genuine work outputs, documented recruitment processes and management accountability at its centre. It also provides for professional talent sourcing, consent-aware candidate handling and reasonable accessibility in recruitment.

The website careers area publishes these as planned recruitment tracks until management approves actual vacancies, official employment terms, a live application channel and associated data-protection processes. Applicants should not treat a design demonstration as a submitted job application.

EDITORIAL CONTROL / Recruitment planning summary; roles not represented as formally open vacancies.

Source context: Terra internal project direction and approved website blueprint. Publication, factual attachments and legal review require management sign-off.
